WORK HISTORY

IONA
Full-Stack Consultant // March 2025 to Present

-

Monstarlab Philippines
Senior Software Engineer // Pasig City (Remote) October 2020 to March 2025
- Serve as a versatile Full-Stack Software Engineer, adapting to project needs by taking on various roles such as Backend Developer (Spring), Frontend Developer (NextJs with TypeScript), Native Android Developer, and Blockchain Developer (Fabric Hyperledger).
- Conduct training on Coding Standards and Best Practices to onboard new hires and ensure code quality.
- Build and maintain AWS and GCP project infrastructures with comprehensive documentation to ensure cost-effectiveness and scalability.
- Perform DevOps tasks such as creating CI/CD pipelines using GitHub Actions to streamline builds, accelerate deployments, and ensure timely delivery to target audiences.

LYKA
Senior Software Engineer // Taguig, Metro Manila, Philippines // Jan 2020 to Oct 2020
- Lead a team of 5 Android developers to efficiently deliver product features on time.
- Reduced infrastructure costs from $9,000 to $2,500 per month by optimizing API calls and implementing caching strategies within the mobile application.
- Spearheaded the reduction of APK size from 150 Mb down to 50 Mb by minifying resources and implementing on-demand functionality.

Stratpoint Global Outsourcing
Lead Software Engineer // Mandaluyong, Metro Manila, Philippines // Aug 2015 to Jan 2020
- Served as the Android Capability Head on the company's Tech Council.
- Member of the company's SWAT team, building project foundations until stabilization, troubleshooting existing projects, and identifying vulnerabilities as needed.
- Collaborate with cross-functional teams to develop mobile applications using the Agile framework, and the SAFe framework for larger projects.

Bittel Asia
Software Engineer // Paranaque, Metro Manila, Philippines // July 2014 to Aug 2015
- Developed a RESTful IPTV system running on Android TV for one of the top hotels in Myanmar
- Solely developed a suite of android applications for the IPTV system, including features such as Video on Demand, Music, Flights, Weather, and more.

EDUCATION

Bachelor of Science - Software Engineering
Central Philippine University // Jaro, Iloilo City, Philippines // May 2014

CERTIFICATIONS
- Google Associate Android Developer - Google Developer Certification - ID 12109090
- AWS Certified Practitioner - Amazon Web Services
